Natanael Lima

Analista Programador Universitario

Programmer Analyst with experience in web and desktop application development. Participate in all phases of the software life cycle, from analysis to implementation and maintenance. I excel at problem solving, logical thinking and teamwork. I am looking for a challenging role to apply my skills and contribute to organizational success.

Experience

Developer **Lovely Dating App**

- Developed the personal project "Lovely", a dating application.
- Implemented technologies such as Java, Spring Boot, HTML, CSS, Bootstrap, Angular, JPA, WebSocket, Restful API, and MySQL for the development and implementation of the application

Developer **E-Commerce App**

- Developed an e-commerce platform with a control panel.
- Implemented search and filter functionalities to improve the shopping experience.
- Used technologies such as Java, Angular and MySQL.
- Improved the use of Spring Boot and Spring Security for the backend, with JWT for authentication and authorization.

Developer **Application Management System**

- Developed a web system for self-management of applications for job offers in a company.
- Used technologies such as Java, Spring, HTML, CSS, Bootstrap, JPA, Thymeleaf, and MySQL in the development and implementation of the project.

Developer **University Project**

- Developed a management system for a parking lot.
- Implemented technologies such as C#, WPF, .NET Framework, Store Procedure and SQL Server.
- Collaborated and worked as a team to understand and address the needs of the project.

Developer **University Project**

- Developed a sales management system for an optical store.
- Implemented client, product, and sales administration features.
- Collaborated with the team to understand and fulfill project requirements.
- Used C#, WinForms, .NET Framework and SQL Server for robust database management.

Developer **University Project**

- Developed a web system for managing business meetings.
- Collaborated in a team to program and manage the application.
- Implemented ORM relationships and developed functionalities, including email notifications.
- Learned and utilized JWT for authentication, along with HTML, CSS, Bootstrap, Angular, NodeJS, Express, TypeScript, and MongoDB.
